Many came to the city from outlying towns to get aboard the excursion train, which left Barre at 8:30 o'clock. The excursionists will return to the city around 9 o'clock this evening.

Mr. Howland was accompanied to Boston by Mr. Haley's son.

Joseph Corti, a North Main street expressman, contributed his share of excitement to an otherwise dull afternoon in Depot square yesterday, when he missed by inches a painful conclusion to his adventure with a fractious horse. Passing through the square, Mr. Corti left the wagon seat and started to walk along one of the hills in order the better to adjust a misplaced check rein. It was when he lost his balance and fell head foremost to the paving that the animal began to kick. One of the truckman's legs was caught between the hill and the tug, while the limit dangled helplessly near the ground. The driver began to appeal rather vociferously to bystanders on the corner as the horse started to kick and several minutes elapsed before he was extricated from his trying position. One elbow was skinned in the shuffle and examination after the mishap revealed a deep cut below the knee of the right leg.

Among the visitors in the city yesterday and to-day were the following people: Mr. and Mrs. A. E. Sanderson of Portland, Me.; W. D. Hall of St. Johnsbury; Mr. and Mrs. W. H. Pitkin of Boston; C. G. DODGING CAPTURE AT SEA

(Continued from first page.)

to a point where she could completely submerge in safety.

Half an hour after the last light of the Deutschland had disappeared the Timmins, seemingly satisfied with her work, turned back and headed up Chesapeake bay in the direction of Baltimore.

During part of the day the Deutschland had remained hidden at a cove up Chesapeake bay.

OFFICIALLY REPORTED OUT.

Tug Timmins Sent Wireless Message to Neutrality Squadron.

Washington, D. C., Aug. 3.—The tug Thomas F. Timmins, which accompanied the German merchantman submarine Deutschland down the bay from Baltimore, reported to the United States neutrality squadron outside Hampton Roads last night that the Deutschland had passed out of the capes at 8:30 p. m.

The Timmins' message was picked up by the destroyer Sterrett, which relayed it to the Norfolk navy yard. The destroyer then was outside the three-mile limit to see that the submersible's passage out was not interfered with by the allied cruiser of the territorial waters of the United States.

While the Sterrett's report did not mention the Deutschland by name, navy officials had no doubt that the reference was to her. The Sterrett, with three other destroyers and the armored cruiser North Carolina, it was pointed out, were doing neutrality duty off the capes with a particular view to preventing violation of American territorial waters in connection with the Deutschland's departure.

It transpired that Mr. Morrison left the stonework where he was employed around 11:30 o'clock in the forenoon, went to his boarding-house and stopped for dinner. Soon after the noon hour he complained of the excessive heat and physicians were called. Before an ambulance could be summoned to remove the man to a hospital he had expired. County Agent F. H. Abbott returned last night from Montpelier Center with three specimens of the oat family that he gathered from the field of Fred Strong in Montpelier Center. Mr. Abbott brought them back with him to illustrate the good points about the different types of oats. The first is known as the common field oat, which is insignificant in size to the bumper oat, which has about 140 oats to the head, while the common oat only yields about 50 on an average, and the stock of the bumper is about twice the size of the common oat. The mammoth cluster oat is the third class and is about a medium, running about 110 oats to the head and has a stock a trifle larger than the common oat but not as large as the bumper. These three varieties were grown in the same field and with the same care, but under close investigation Mr. Abbott has decided that the bumper oat will yield about 50 bushels more to the acre than the common oat and 15 more than the mammoth cluster.

Barre granite in the movies is to be one of the primary results of an educational move to be undertaken by the quarrymen and manufacturers' associations to-morrow, when Raymond Agnel, an expert cinematograph operator in the employ of the C. L. Chester studios of New York, will take his camera to the quarries. With his assistants, Mr. Agnel plans to arrive in the city this evening, the party to be registered at Hotel Barre while the industry is being photographed. Putting Barre's principal industry in the movies is one of the features of the educational campaign that is being carried on with the nation-wide advertising campaign in behalf of Barre granite. All quarries on Millstone hill are to be placed at the disposal of the cinematograph operator and every effort will be made to assist him in the rather precarious task of filming operations on the hilltop.
